"But I will restore you to health & heal your wounds," declares the Lord." *Jeremiah 30:17* Prostate cancer is the second leading cause of cancer deaths. It is most frequently found in men over 65 but rare cases in men younger than 45. It is generally slow growing & easily treatable. With few symptoms, it is important to note signs of potential problems like: difficulty urinating, pain during urination, blood in the urine, pain in the lower back/hips/upper thighs. See a physician for a digital rectal exam &/or blood test for PSA (prostate-specific antigen). If diagnosed, treatment may include surveillance, surgery, radiation, hormone or chemotherapy.
